

Javier Márquez

Fullstack Developer — React · Next.js · Node.js

hello.jmarquez@gmail.com | +56 9 6564 1891 | [LinkedIn](#) | [GitHub](#) | Guayaquil, Ecuador

PROFILE

Fullstack developer with 2+ years of experience building web and mobile applications with React, Next.js, and Node.js — all in production. Experienced with REST API design, MongoDB, AWS S3, TypeScript, and workflow automation with n8n. Comfortable in fully remote and asynchronous environments. English B2.

EXPERIENCE

Fullstack Developer · IT & SEO Consultant · **Success Journey**

March 2024 – Present

- Built and maintained web interfaces and backend services using React and Node.js.
- Developed and consumed RESTful APIs for client projects.
- Automated business workflows using n8n (data pipelines, integrations).

Fullstack Web Developer · Freelance · **Independent**

December 2022 – Present

MoveMusic White Label — 2024

- Built the backend layer of a music distribution platform using Next.js API Routes with TypeScript (BFF pattern).
- Handled chunked audio uploads, pre-signed AWS S3 URLs, audio format validation, and MongoDB persistence.
- Stack: Next.js, TypeScript, MongoDB, AWS S3, JWT.

Mejubilo.com — June 2024

- Built full-stack platform for retirement savings reports — REST API with Node.js/Express and React frontend.
- Stack: React, Node.js, Express, MongoDB, TypeScript.

MVP Pension Simulator — August 2024

- Built a Next.js web app for provisional retirement savings reports with real-time data.

STOKER — January 2023

- Built a React inventory management app for small businesses with real-time stock tracking.

PAYFRIEND — June 2023

- Built a React Native crypto and virtual wallet mobile app with reusable components and full navigation flow.
